In-Bum Chung

Research interests: Resilient Design, Design Optimization, Stochastic Optimization, Complex Networked Systems

(+1) 217-420-4689 • inbumbc2@illinois.edu • In-Bum Chung • https://ibchung.github.io/

Education

University of Illinois Urbana-Champaign — **Illinois, United States**
Ph.D. in Industrial Engineering — *In Progress*
Advisor: Professor Pingfeng Wang

Hanyang University — **Seoul, Republic of Korea**
M.S. in Mechanical Engineering — *February 2018*
Thesis: Dimensionality reduction using statistical analysis and model based methods: a comparison between elementary effect method and random forest regressor
Advisor: Professor Dong-Hoon Choi

Hanyang University — **Seoul, Republic of Korea**
B.S. in Mechanical Engineering (Cum Laude) — *February 2016*

Work Experience

PIDOTECH Inc. — **Seoul, Republic of Korea**
Research Engineer (Full-time) — *February 2018-June 2021*
Research Engineer (Part-time) — *July 2021-June 2022*

- R&D for optimization algorithms and metamodeling & domain reduction techniques
- Investigation on deep-learning applications for engineering design

Teaching Experience

Mavis Future Faculty Fellow — 2025-2026
Certificate in Foundations of Teaching (UIUC CITL)

Teaching Assistantship (**Recognized on the "List of Teachers Ranked as Excellent by Their Students"*)
SE 101: Engineering Graphics & Design* — Spring 2025
SE 410: Components Design — Fall 2024
SE 450: Decision Analysis I — Fall 2023

Projects

- **Data-Driven Design Decision Support for Remanufacturing of High-Value Components in Industrial and Agricultural Equipment** (11/2023 – 09/2025)
  - Project funded by REMADE Institute: collaborating with industrial partner (John Deere) to create models for evaluating economic and environmental impact of manufacturing and remanufacturing equipment, conducting failure mode analysis, cost analysis, and establish framework for design for reman (DfRem); expand concept to system-level with multiple parts; estimate system behavior through data-driven modeling

- **Multi-timescale Nuclear-Renewable Hybrid Energy Systems Operations to Improve Electricity System Resilience, Reliability, and Economic Efficiency** (09/2022 – 12/2023)
  - Project funded by DOE: establishing an open-source repository to share the dataset and codes for resilient

power networks through deep generative approach for disruption management; establishing a lab setup for hardware-in-the-loop (HIL) test for integrated energy system (IES) control

Journal Publications *(*co-first authorship)*

Awards & Fellowships

ISE Jerry S. Dobrovolny Graduate Student Fellowship	AY 2025-2026
Ben Hamilton Graduate Research Award	2024
Hansen Fellowship	2022
